This book covers specific conditions relating to men's health as well as the important issues of lifestyle and wellbeing. It is helpful for primary care practitioners, who need to encourage their male patients to visit them more often and to embrace preventative strategies for their health. Vivid account of the secret police as an institution and of Russian society's reactions to it. Smoking in the Third World has grown alarmingly, and recent patterns of disease reveal that tobacco is now an important cause of ill health in developing nations. Ram Nath outlines a plan of action to halt this trend, using health information programs, legislation, and international cooperation. This study will interest anyone involved in preventive or environmental medicine in the Third World, as well as those working with development groups, charities, cancer research organizations, and tobacco companies. David Welch re-appraises one of the most closely studied issues in European history - the appeal of the Nazi party and challenges previously held assumptions about the effectiveness of Nazi propaganda. Variations on a theme introduced by C. P. Snow's "The two cultures", showing that science, art and religion can find a common language. This volume discusses the relationship between

the Rockefeller Foundation, a private philanthropic organization in the USA, and 15 universities in 12 developing countries throughout a 20-year period. Split into four parts, it describes the formation of the Rockefeller Foundation Program and the dimensions to be examined. It then presents case studies, and looks at the process of institution building and the critical issues of university development in the Third World. Finally, it attempts to draw some conclusions about the process of university development from the specific Foundation experience. The recent and ongoing crises in the Middle East, the Persian Gulf, Central America, and southern Africa have been and continue to be approached in very different ways by the United States and its West European allies. Payne provides a comprehensive analysis of the underlying tensions, as well as cooperation, between the U.S. and NATO countries in out-of-area conflicts. The book maintains that the U.S. must adapt its foreign policy to a new international order, rather than continuing its old political and ideological confrontationalism in the Third World. A thought-provoking assessment and documentation of one of the most terrible periods in history - the rise and fall of the Nazi Party. Anthology of contemporary Kannada short stories by women authors. The story is fictional, but seems to have some basis in fact. For example, Aven is really Dothan, Alabama -- Douglas Bailey's hometown. Giovanni Graziani examines Gorbachev's reforms in terms of economic relations with the Third World and presents a detailed and sophisticated statistical analysis of Soviet economic assistance and trade. This book critically evaluates all the statistical data from Soviet and United Nations sources and presents the changing Soviet attitude toward indebtedness and the growing dissatisfaction expressed by both the Third World and the U.S.S.R. over the management of Soviet aid. The author notes a contradiction between Gorbachev's strategy and statistical evidence for the first years of his office, but stresses that the recent moves to trade with South Korea and other Asian countries are bound to affect the Soviet geographical pattern of trade. His estimates show the increasing importance of agricultural products and fuels in

Soviet imports and of military equipment and fuels in its exports. Particularly interesting is what Graziani calls the oil imbroglio, a triangular trade pattern in which the U.S.S.R. has increased its imports of crude oil from the Third World for reexport to the West in order to stabilize its export earnings in hard currencies threatened by falling oil prices. The book concludes that no expansion of Soviet economic ties with the Third World is foreseen in the short run and that eventual Soviet participation in international economic organizations might further entail new conflicts with the Third World. "Recent years have seen a heightened awareness of the plight of victims of crime and of their neglect by the traditional criminal justice system with its bureaucratic and institutional processes. This concern for the victim has been shared by diverse groups, including humanists, conservative "law and order" politicians, feminists, and grassroots community advocates. This combination of forces has stimulated a mass of legislative reform at both the federal and state levels. Many

jurisdictions have adopted a "Bill of Rights" for the victim; public funds have been established to compensate victims; courts have been enjoined to order offenders to make restitution; welfare agencies have developed programs to provide victims with assistance; and courts are inviting victims to testify at the sentencing hearings of their offenders." "These reforms and proposals have been accompanied by a growing body of literature that discusses the needs of victims and analyzes the merits and drawbacks of particular reforms, some of which have been evaluated empirically. What has been lacking until now is an integrated overview that looks at their philosophical underpinnings and considers how these different and sometimes conflicting proposals are conceptually related to one another and to other prevailing criminal justice doctrines and ideologies. Leslie Sebba fills this gap in Third Parties."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved
