Kitchens Jul 01 2022 This engrossing history of the domestic kitchen covers 10 decades that saw our culinary traditions accommodate extraordinary changes in technology and the irresistible process of globalisation. Each chapter surveys the external influences on households and their kitchens, samples the dishes prepared during the decade, and discusses the structure of meals. A study of kitchen equipment and design then closes each chapter, cumulatively revealing more innovation in these aspects than in what we ate. 'Kitchens: The New Zealand kitchen in the 20th century' is the culmination of a 10-year research and writing project by anthropologist Helen Leach, supported by the Marsden Fund of the Royal Society of New Zealand, focusing on the material culture of cooking by New Zealanders living in the past two centuries. The project has led to the publication of *From Kai to Kiwi Kitchen* (2010), *The Pavlova Story* (with Mary Browne, 2008), *The Twelve Cakes of Christmas* (with Mary Browne and Raelene Inglis, 2011) and this book. Helen Leach is an Emeritus Professor of Anthropology at the University of Otago. Her research interests include the evolution of human diet and prehistoric horticulture. *The Pavlova Story* was shortlisted in the Montana New Zealand Book Awards 2009.

Old Cooking Utensils Dec 26 2021 How we equip and use our kitchen has changed irrevocably over the centuries, the twentieth century has seen far-reaching technological and social changes making their mark; the kitchen fire, for many a century the focal point of the house, has given way to electricity and gas. David J. Eveleigh looks at the kitchen that centered on the open hearth or range

and surveys the equipment used for storing and preserving, preparing, boiling, roasting and baking food. This is an intriguing topic, shedding light on how the routine of our lives can be influenced by new inventions and on how we are continuously driven to conceive of new technology in an attempt to ease life's chores.

By Fire, By Water Oct 24 2021 Recipient of the Independent Publishers Award for Historical Fiction (Gold Medal), the Foreword Book of the Year Award for Historical Fiction (Bronze Medal), and an honorable mention in the category of General Fiction for the Eric Hoffer Award. Luis de Santángel, chancellor to the court and longtime friend of the lusty King Ferdinand, has had enough of the Spanish Inquisition. As the power of Inquisitor General Tomás de Torquemada grows, so does the

brutality of the Spanish church and the suspicion and paranoia it inspires. When a dear friend's demise brings the violence close to home, Santángel is enraged and takes retribution into his own hands. But he is from a family of conversos, and his Jewish heritage makes him an easy target. As Santángel witnesses the horrific persecution of his loved ones, he begins slowly to reconnect with the Jewish faith his family left behind. Feeding his curiosity about his past is his growing love for Judith Migdal, a clever and beautiful Jewish woman navigating the mounting tensions in Granada. While he struggles to decide what his reputation is worth and what he can sacrifice, one man offers him a chance he thought he'd lost...the chance to hope for a better world. Christopher Columbus has plans to discover a route to paradise, and only Luis de Santángel can help him. Within the dramatic story lies a subtle, insightful examination of the crisis of faith at the heart of the Spanish Inquisition. Irresolvable conflict rages within the conversos in *By Fire, By Water*, torn between the religion they left behind and the conversion meant to ensure their safety. In this story of love, God, faith, and torture, fifteenth-century Spain comes to dazzling, engrossing life.

Rules for Reformers Apr 17 2021 In *Rules for Reformers*, Douglas Wilson poaches the political craft of radical progressives and applies it to Christian efforts in the current culture war. The result is a spicy blend of combat manual and cultural manifesto. *Rules for Reformers* is a little bit proclamation of grace, a little bit Art of War, and a little bit analysis of past embarrassments and current cowardice, all mixed together with a bunch of advanced knife-fighting techniques. As motivating as

it is provocative, Rules for Reformers is just plain good to read. Thanks to Saul Alinsky's Rules for Radicals: A Practical Primer for Realistic Radicals--a book well-beloved by Barack Obama, Hillary Clinton, and many others--for much of the shrewd advice, and for none of the worldview.

The Electric Century Aug 02 2022 This book is about how electricity has profoundly changed the way we live, work, and play. Some twenty topics are covered, with an abundance of graphs and images to build a comprehensive picture. Each looks at the developments, and the people who initiated them, together with how one led to the next and their subsequent impact on society. Topics include electric supply, lighting through X-rays, and all those appliances that make our homes so comfortable. Most homes at the end of the twentieth century were full of electrical equipment, much of which was regarded as essential. It ran from lights, washing machines, fridges, freezers, kettles, telephones and so on, to the more subtle things such as wipers and starter motors on cars. In 1900, in all but a tiny minority of houses, there were none of these things. It is very difficult for us now to imagine a world without electrical equipment everywhere, and yet it has only taken a century. The Electric Century examines how we got from then to now. The nineteenth is often described as the century of steam from the impact it had on employment and transport, and The Electric Century makes a similar claim as the description of the twentieth. Electricity and the equipment using it are so pervasive that they have affected every corner of modern life.

Kasher in the Rye Aug 22 2021 A hopeful and inspiring "act of comedic magic" from comedian—and now memoirist!—Moshe Kasher (Artie Lange, #1 New York Times bestselling author of *Too Fat to Fish*). Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs

when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But *Kasher in the Rye* is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control-his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carroll...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

Radar Instruction Manual Feb 25 2022 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

The 1950s Kitchen Jan 27 2022 The 1950s was the first great age of the modern kitchen. Labour-saving appliances, bright colours and the novelty of fitted units moved the kitchen from dankness

into light, where it became the domain of the happy housewife and the heart of the home. New space-age material Formica, decorated with fashionable patterns, topped sleek cupboards that contained new classic wares such as Pyrex and 'Homemaker' crockery, and the ingredients for 1950s staples: semolina, coronation chicken and spotted dick. Electricity entered the kitchens of millions, and nowhere in the home was modern technology and modern design more evident. Bold colour, clean lines and stainless steel were keynotes of the decade. This book – a celebration of cooking, eating and living in the 1950s kitchen – is a feast of nostalgia, and a mine of inspiration for anyone wanting to recreate that '50s look in their own home.
