Understanding the discourse of text messaging has profound implications for society. SMS text messaging has impacted considerably on how we communicate with others. Negative, sometimes alarmist media coverage continues to fuel debate surrounding its 'damaging' effects on language and literacy, yet these portrayals tend to be based on extreme or fictionalised accounts of text messaging. What kind of language do people

really use when they text? Drawing on a range of academic sources from various fields, this book describes the language used in a corpus of over 11,000 text messages, as yet the largest collection in the UK. In particular, the book shows how the discourse of text messaging is shaped by users' often creative responses to the functions and constraints of the medium. This is an essential book for upper level undergraduates and postgraduates studying discourse analysis, as well as educators wanting to understand this important new form of discourse. Good and bad. Right and wrong. Decent and indecent. The line that separates them is thinner than you think. PC Steve Fuller has served as an officer for over twenty years. There's nothing he hasn't seen, nothing he can't deal with. He might be closing in on forty but he's still in good shape, his head on straight, his instincts sharp. Or so he thinks. Until Anna Johnson. Hours before washing her dried blood from his body, Steve holds the young woman's hand in the wreckage of the car, comforting her as best as one stranger to another can in the most critical moment of her life. He's the last person she'll see. She's another tragic victim of the road. Another fatality. At the end of another shift. Except she won't go away. Pale blue eyes and porcelain skin framed by ebony hair haunt his sleep at night and his conscience during the day. Compelled to find out more about what, or who, caused Anna to lose control of the car that night, Steve goes looking for answers. But

they're not easy to find. And the more he tries to do right, the more everyone tells him he's wrong, until - piece by piece - he can't be entirely sure of the difference any more. As the autopilot driving his life falters - colleagues questioning his decisions, physical sensations he can't control, thoughts that leave him uneasy - the truth about Anna Johnson begins to unravel. And it's nothing like he expects. Critical Incident is a gripping and heart-breaking page-turner, and the first book in the Code Zero police drama series This book was previously published under the title No Further Action "A wonderfully touching and powerful story." "A must read for anyone who likes deep, sometimes funny, sometimes heartbreakingly sad, explorations of the human condition." "Had me engaged from the start" This book provides a comprehensive linguistic exploration of textism use by bilingual young adults, illustrating the function of alternative and creative linguistic features and their role in conveying tone through text. Drawing on a corpus of nearly 45,000 text messages donated by bilingual young adults in New York City, this volume explores the ways in which the use of texting features such as 'lol,' emojis, abbreviations, and acronyms is systematic and essential. In part, toward the aim of exposing the tensions bilinguals face navigating a platform that preferences monolingual language practices, the book highlights creativity as a means of both constructing meaning and performing identity for bilingual

youths. These findings are extended to explore the role texting plays in communication and identity construction in contemporary society more generally. This volume extends the boundaries of emerging research on language and digital communication, and will be of particular interest to graduate students and scholars in computer-mediated communication, pragmatics, and new media. This resource contains more than 300 text messages expressing a wealth of emotions, with love dominating all of them. Don't you sometimes wish that God would send you text messages through the day, giving you advice and encouragement? Well, actually he has already sent you countless messages through the greatest text of all: the Bible. This devotional book for junior high aged students will unlock some of the things God has to say to them from his Word: guidance for their day, comforting words, and challenges for their lives. Text Messages is the first multi-genre collection by Montreal-based Iraqi hip-hop artist, activist, and professor Yassin "Narcy" Alsalman. Composed entirely on a smartphone during air travel and married to artwork from comrades, Narcy's writing speaks of the existential crises experienced by diasporic children of war before and during imperialism in the age of the Internet. Narcy's verses span the space

between hip-hop and manifesto, portraying a crumbling, end-stage capitalist society, visions for a new reality, and the myth of multiculturalism in post-9/11 North America. The wordsmith hollows and transmogrifies the grotesque excess of the West by juxtaposing McLife with images of death, destruction, and trauma in the East. From the depths of apathetic consumerism arises a voice of spiritual self-realization that explodes the misrepresented, mythical monolith of Islam in the West and with the rubble builds healing through intelligent resistance and radical love. "Young boys and girls trapped in Walmarts—our consumer interim camps. A family-friendly, discounted freedom. You don't see what the Internet can't. Not our land or home. Not your mans or holmes. Not your towers or domes. Not your power or drones." Academic Paper from the year 2019 in the subject English Language and Literature Studies - Linguistics, grade: 1, University of Linz (Linguistik), course: Discourse Linguistics, language: English, abstract: This research paper explores texting as a language variety. It will summarize and explain the defining linguistic features, meaning-making elements of texting, and their frequency of use. Therefore, the works of the leading expert on the language of texting, David Crystal, serves as the theoretical basis. To determine how and how often certain features are used, a corpus of text messages will be analyzed. Furthermore, the paper will present the main causes and incentives

responsible for the development of these features; it will start with general information on the corpus, followed by a description and analysis of the most commonly used linguistic features, their usage, and purpose.
