Industry: Microbiological  
Issues in Papermaking features  
in-depth and thorough  
coverage of microbiological  
issues in papermaking and  
their consequences and the  
current state of the different  
alternatives for prevention,  
treatment and control of  
biofilm/slime considering the  
impact of the actual  
technological changes in  
papermaking on the control  
programmes. The microbial  
issues in paper mill systems,  
chemistry of deposits on paper  
machines, the strategies for  
deposit control and methods  
used for the analysis of  
biofouling are all dealt in this  
book along with various growth  
prevention methods. The  
traditional use of biocides is  
discussed taken into account

the new environmental  
regulations regarding their  
use. Finally, discusses the  
trends regarding the future of  
the microbiological control in  
papermaking systems. In-depth  
coverage of microbiological

Chromatography** Aug 22  
2021 Chromatographic &  
Electrophoretic Techniques,  
Fourth Edition, Volume I:  
Paper and Thin Layer  
Chromatography presents the

methods of paper and thin layer chromatography. This book discusses the practical approach in the application of paper and thin layer chromatography techniques in the biological sciences. Organized into 18 chapters, this edition begins with an overview of the clinical aspects related to the detection of those metabolic diseases that can result in serious illness presenting in infancy and early childhood. This text then discusses the three major types of screening for inherited metabolic disorders in which paper or thin-layer chromatography are being used, including screening the healthy newborn population, screening the sick hospitalized child, and screening mentally retarded patients. Other chapters consider the procedures for thin layer chromatography. This book discusses as well the complexity of amino acid mixtures present in natural products. The final chapter deals with the detection of synthetic basic drugs. This

book is a valuable resource for chemists and toxicologists.

*The Book of Paper* Jan 07 2023  
In the first volume of Post Editions's new series on the creative potential of seemingly everyday materials, the subject is paper - in amazing depth.

This striking book asks nine scholars and artists to take a multi-layered look at paper, from its beginnings in second-century China to surprising contemporary approaches. Essay topics include: species of wasps and hornets that make paper and cardboard remarkably similar to our own; the 18th-century German clergyman whose life's work was experimenting with various materials to make paper; and Cardboardia, a community of "visionary architecture." Origami master Paul Jackson writes about "paper music" - using paper as an acoustic medium, and Chiaki Morita introduces washi, the Japanese art of hand-made paper from the mulberry tree. Stunning black and white photos complete this impeccable package.
