"A collection of ten short stories that all take

place in the same day about kids walking home from school"-- Now available in paperback, this fascinating book presents scenarios for the broad trends that will have a significant impact upon future water challenges. Population growth and unchallenged water use have brought us to the brink of a worldwide water crisis. Examine what the next 100 years may bring to water use, prices, and availability--and how individuals, water utilities, industries, and countries can change the future of water. Discussions include: On home use-Grass species that live on common seawater, clothes washers that use a cup of water per load--or no water at all, UV-light dishwashers; On agricultural use - Packaging, "Irrigated with natural rainfall, no fossil waters used."; On industrial use - Old industrial cities in the rainy northeast US that have been shrinking and decaying for decades may experience revitalization; On water storage - America is tearing down many old dams, while China and Africa are on dam-building binges. What are the

alternatives? On the role of water - Rivers, lakes, and aquifers cross political borders, creating conflicts. Learn about many innovative technologies and creative solutions to water problems. (Hardcover ISBN 9781583218099 published in 2011) 'Jennifer Ackerman knows what she's talking about...Her knack for catching the personalities of different species in gorgeous, playful prose further collapses comfortable barriers between the human and the birdlike' Daily Telegraph 'The real joy of [this] book is its close attention to some of the specialists of the region... Ackerman is alive to the humour at play in field research ' Mark Cocker, Spectator It's flight and egg and feathers and song. It's the demure plumage of a mountain thornbill and the extravagant tail feathers of an Indian paradise flycatcher, the solo song of a superb lyrebird and the perfectly timed duets of canebrake wrens, an osprey's hurtling dive toward the sea, and a long-legged heron's still, patient eyeing of the dark water.

There is no single bird way of being. Drawing on personal observations, the latest science, and her bird-related travel around the world, Jennifer Ackerman playfully explores our dramatically shifting understanding of these magnificent animals. It is a dangerous, addictive white powder that can be found in abundance throughout this country. It is not illegal. In fact, it is available near playgrounds, schools, and workplaces. It is in practically everything we eat and drink, and once we are hooked on it, the cravings can be overwhelming. This white substance of abuse is sugar. Over two decades ago, Nancy Appleton's *Lick the Sugar Habit* exposed the health dangers of America's high-sugar diet. Now, in *Suicide by Sugar*, Appleton, along with journalist G. N. Jacobs, presents a broader view of the problems caused by our favorite ingredient. The authors offer startling facts that link a range of disorders—from dementia and hypoglycemia to obesity and cancer—to our growing sugar addiction.

Rounding out the book is a sound diet plan along with a number of recipes for sweet, easy-to-prepare dishes—all made without sugar or fruit. *Suicide by Sugar* shines a bright light on our nation's addiction and helps us begin the journey toward health. An expert on the psychology of leadership and the bestselling author of *Integrity*, *Necessary Endings*, and *Boundaries For Leaders* identifies the critical ingredient for personal and professional wellbeing. Most leadership coaching focuses on helping leaders build their skills and knowledge and close performance gaps. These are necessary, but not sufficient. Using evidence from neuroscience and his work with leaders, Dr. Henry Cloud shows that the best performers draw on another vital resource: personal and professional relationships that fuel growth and help them surpass current limits. Popular wisdom suggests that we should not allow others to have power over us, but the reality is that they do, for better or for worse. Consider the boss who diminishes

you through cutting remarks versus one who challenges you to get better. Or the colleague who always seeks the limelight versus the one who gives you the confidence to finish a difficult project. Or the spouse who is honest and supportive versus the one who resents your success. No matter how talented, intelligent, or experienced, the greatest leaders share one commonality: the power of the others in their lives. Combining engaging case studies, persuasive findings from cutting-edge brain research, and examples from his consulting practice, Dr. Cloud argues that whether you're a Navy SEAL or a corporate executive, outstanding performance depends on having the right kind of connections to fuel personal growth and minimize toxic associations and their effects. Presenting a dynamic model of the impact these different kinds of connections produce, Dr. Cloud shows readers how to get more from themselves by drawing on the strength and expertise of others. You don't have

a choice whether or not others have power in your life, but you can choose what kinds of relationships you want. In 1950s England, well-brought-up young women are meant to aspire to the respectable life. Some things are not to be spoken of; some are most certainly not to be done. There are rules, conventions. Meg Bailey obeys them. She progresses from Home Counties school to un-Bohemian art college with few outward signs of passion or frustration. Her personality is submerged in polite routines; even with her best friend, Roxane, what can't be said looms far larger than what can. But circumstances change. Meg gets a job and moves to London. Roxane gets married to a man picked out by her mother. And then Meg does something shocking - shocking not only by the standards of her time, but by our own. As sharp and startling now as when it was written, *Don't Look at Me Like That* matches Diana Athill's memoirs *After a Funeral* and *Instead of a Letter* in its gift for storytelling and its unflinching

candour about love and betrayal. "A brilliant and groundbreaking argument that innovation and progress are often achieved by revisiting and retooling ideas from the past rather than starting from scratch--from The Guardian columnist and contributor to The Atlantic, "-- Baker & Taylor. A totalitarian regime has ordered all books to be destroyed, but one of the book burners suddenly realizes their merit. A breathtaking look at the most beautiful of all the planets with its magnificent rings and moons. From School Library Journal: "An introduction to the planet and its major satellites. Despite the strength of the text, it is the color photos that steal the show, highlighting [the] planet's exotic beauty in much the same way that black-and-white photography accented the moon's starkness. In all, a delightful coupling of sound exposition with dazzling illustrations." Newly Updated 2012. "As you gaze into the starry sky, you might feel isolated from the Universe around you - but you're not. This book reveals the

startling ways life on Earth is touched by our cosmic environment, and demonstrates why without such contact, life itself wouldn't be possible." "Heaven's Touch embarks on an unforgettable journey across the cosmos, beginning in near space with a look at the gentle ebb and flow of lunar and solar tides. Acclaimed astronomer James Kaler describes their subtle effects on our world and also explores the Sun's more potent influences, such as solar storms that cause auroras, give comets their tails, and knock out power grids on Earth. He ventures across the Solar System to consider how the planets can act to produce climate change, even global disaster. Kaler shows how Jupiter's gravity can throw asteroids toward potentially devastating collision with Earth, and how even our whole Galaxy might hurl comet storms at us. He then takes us into deepest space to describe the cosmic rays launched at us from exploding stars, and considers not just how these exploders might harm us, but how they also join

together in the creation of stars and how they serve to populate the Universe with the very building blocks of life." --Book Jacket. From starting her first company at age twenty-three with only \$23,000 to selling her last company at age forty for \$377 million and becoming an angel investor, author Amy Rees Anderson knows how to succeed in the world of business and how to do it the right way. In *What AWESOME Looks Like: How to Excel in Business and Life*, Amy shares valuable insights and strategies for success that aspiring entrepreneurs, employees, and executives can easily replicate in their own lives. *What AWESOME Looks Like* will inspire and motivate you to join the ranks of those who don't just dream, they do. And that is what AWESOME looks like! A novel that marks the debut of a sexy and wickedly entertaining new mystery series, *If Looks Could Kill* introduces a heroine whose blend of wry humor and gutsiness will win over readers everywhere. Bailey's in bed with her

commitment-challenged lover K.C. when she gets a frantic call from her high-maintenance boss at *Gloss* magazine. Grabbing coffee and a cab outside her Greenwich Village apartment—the consolation prize in her divorce settlement—Bailey reluctantly heads uptown. At Cat Jones's Upper East Side town house, she finds something that seriously clashes with the chic decor: the dead body of the family's live-in nanny. As Bailey-unofficially-delves into the murdered girl's past, she finds no shortage of A-list suspects. But when a startling discovery suggests that Cat may have been the intended victim, Bailey is suddenly up to her bed head in a high-profile investigation that's perfect fodder for a tabloid headline: Is someone trying to kill the editors of women's magazines? With the spotlight on New York's glitzy media world, Bailey interviews back-stabbing editors, straying husbands, and one sexy, six-foot-two psychologist who could make her decide to kick K.C. to the curb. Sporting her pair of red

slingbacks and armed with the investigative skills she's honed as a true crime reporter, she sets out on a search that takes her from Manhattan's exclusive Carnegie Hill area--the nanny heartland of America--to the ritzy weekend estates of Pennsylvania and Connecticut. Bailey will need all her street smarts and some lightning-fast detective work to catch a killer who could end up deleting her name from the masthead for good. **LONGLISTED FOR THE NATIONAL BOOK AWARD • YALSA EXCELLENCE IN NONFICTION FINALIST • A ROBERT F. SIBERT HONOR BOOK** This beautifully illustrated, oversized guide to the people and technology of the moon landing by award-winning author/illustrator John Rocco (illustrator of the Percy Jackson series) is a must-have for space fans, classrooms, and tech geeks. Everyone knows of Neil Armstrong's famous first steps on the moon. But what did it really take to get us there? The Moon landing is one of the most ambitious, thrilling, and

dangerous ventures in human history. This exquisitely researched and illustrated book tells the stories of the 400,000 unsung heroes--the engineers, mathematicians, seamstresses, welders, and factory workers--and their innovations and life-changing technological leaps forward that allowed NASA to achieve this unparalleled accomplishment. From the shocking launch of the Russian satellite Sputnik to the triumphant splashdown of Apollo 11, Caldecott Honor winner John Rocco answers every possible question about this world-altering mission. Each challenging step in the space race is revealed, examined, and displayed through stunning diagrams, experiments, moments of crisis, and unforgettable human stories. Explorers of all ages will want to pore over every page in this comprehensive chronicle detailing the grandest human adventure of all time! Wall Street Journal Bestseller Much of the advice we've been told about achievement is logical, earnest...and downright wrong. In Barking Up

the Wrong Tree, Eric Barker reveals the extraordinary science behind what actually determines success and most importantly, how anyone can achieve it. You'll learn:

- Why valedictorians rarely become millionaires, and how your biggest weakness might actually be your greatest strength
- Whether nice guys finish last and why the best lessons about cooperation come from gang members, pirates, and serial killers
- Why trying to increase confidence fails and how Buddhist philosophy holds a superior solution
- The secret ingredient to "grit" that Navy SEALs and disaster survivors leverage to keep going
- How to find work-life balance using the strategy of Genghis Khan, the errors of Albert Einstein, and a little lesson from Spider-Man

By looking at what separates the extremely successful from the rest of us, we learn what we can do to be more like them—and find out in some cases why it's good that we aren't. *Barking Up the Wrong Tree* draws on startling statistics and surprising anecdotes to

help you understand what works and what doesn't so you can stop guessing at success and start living the life you want. A mother or father of young children may not have a lot of time to read a lengthy book on parenting wisdom. Their days are filled with kid crisis management interrupted by glorious moments of silence and calm. This book was written for those moments. The chapters are designed with the busy parents in mind. It takes 3 to 5 minutes to read one chapter and there is a "meditation" phrase at the end of the chapter to help retain the point of the chapter. Our friends would tell us, "Your kids are so awesome, what are you doing? You should write a book." Claire and I heard this over and over, and every time we would just nod our head in gratitude and laugh to ourselves. "Could you image us writing a book? That would be so out of our comfort zone." And it was. We didn't set out as parents to write a book, but we did seek out wisdom of all kinds. We looked at other parents to see what they were doing right and what they

were doing wrong. We actively pursued book knowledge and divine wisdom as well. Many of our parenting ideas came from seeking God's face and simply saying, "Help. We don't know what to do". It is often said, "Kids don't come with a manual" and that is true because they are not machines. Children are more of a work of art. They need both the skill of a craftsman, and the intuition of an artist. An artist uses their imagination and tries to create the painting without damaging the canvas. Don't read this book like it is a manual and try to follow all of the Dunham's rules. Rather, use this book to start down your own path of discovery.

Parenting wisdom is out there for you, just ask for it. On the 10th anniversary of her daughter Autumn's abduction, Francine receives an anonymous note containing just five words: I KNOW WHERE SHE IS. When a young woman appears claiming to have sent a letter that says she knows the location of Francine's missing daughter, Autumn, Francine wants to dismiss it

as a cruel, twisted joke. But the stranger knows things that only Autumn would know. It soon becomes clear that Francine must go to dark places in order to learn the truth about her child's kidnapping. She will discover that danger comes from unexpected sources. She will do things she never imagined herself capable of. But will Francine get her daughter back—or is it too late? A heart-stopping, gripping thriller for fans of C. L. Taylor, Karin Slaughter, and Linwood Barclay. Totally Awesome Search and Find has over 500 things to search and spot that will keep your child entertained for hours. Patsy Goh and her best friend Elena Tan travel back to 1988 again. This time, they're on a mission to save their friends who have been kidnapped by a member of the Midnight Warriors cult. Patsy also makes a startling discovery about herself that might just change her life forever... Mount Emily Revisited is the second in a series of books which centre on two time-traveling 13-year-old students at Mount Emily Girls' School. The

books feature time travel with a strong focus on female teen friendship whilst exploring the girls' family backgrounds and how they deal with their very different problems. Christian Evangelist and Author Marilyn Hickey shares the details of her thirty years of ministry and amazing friendships within the Muslim world. A FINALIST for the Booker Prize, the National Book Critics Circle John Leonard Prize, the VCU/Cabell First Novelist Prize, the Lambda Literary Award, the NYPL Young Lions Award, and the Edmund White Debut Fiction Award "A blistering coming of age story" —O: The Oprah Magazine Named a Best Book of the Year by The New York Times, The Washington Post, New York Public Library, Vanity Fair, Elle, NPR, The Guardian, The Paris Review, Harper's Bazaar, Financial Times, Huffington Post, BBC, Shondaland, Barnes & Noble, Vulture, Thrillist, Vice, Self, Electric Literature, and Shelf Awareness A novel of startling intimacy, violence, and mercy among friends in a

Midwestern university town, from an electric new voice. Almost everything about Wallace is at odds with the Midwestern university town where he is working uneasily toward a biochem degree. An introverted young man from Alabama, black and queer, he has left behind his family without escaping the long shadows of his childhood. For reasons of self-preservation, Wallace has enforced a wary distance even within his own circle of friends—some dating each other, some dating women, some feigning straightness. But over the course of a late-summer weekend, a series of confrontations with colleagues, and an unexpected encounter with an ostensibly straight, white classmate, conspire to fracture his defenses while exposing long-hidden currents of hostility and desire within their community. Real Life is a novel of profound and lacerating power, a story that asks if it's ever really possible to overcome our private wounds, and at what cost. We're all in Sales now Parents sell their kids on going to bed. Spouses sell their

partners on mowing the lawn. We sell our bosses on giving us more money and more time off. And in astonishing numbers we go online to sell ourselves on Facebook, Twitter and Match.com profiles. Relying on science, analysis and his trademark clarity of thought, Pink shows that sales isn't what it used to be. Then he provides a set of tools, tips, and exercises for succeeding on this new terrain - including six new ways to pitch your idea, three ways to understand another's perspective, five frames that can make your message clearer, and much more. "Women the world over are brought up to hope, even expect, to find the man of their dreams, marry and live happily ever after. When Stephanie Woods meets a sweet, sophisticated man who owns land and businesses, she embarks on an exhilarating romance with him. He seems compassionate, truthful and loving. He talks about the future with her. She falls in love. She also becomes increasingly beset by anxiety at the lavish three-act plays he offers her in the form of excuses for

frequent cancellations and no-shows. She begins to wonder, who is this man? When she ends the relationship Stephanie switches back on her journalistic nous and uncovers a story of mind-boggling duplicity and manipulation. She also finds she is not alone; that the world is full of smart, sassy women who have suffered the attentions of liars, cheats, narcissists, fantasists and phonies, men with dangerously adept abilities to deceive. In this brilliantly acute and broad-ranging book, Wood, an award-winning writer and journalist, has written a riveting, important account of contemporary love, and the resilience of those who have witnessed its darkest sides." --Back cover. NEW YORK TIMES EDITORS' CHOICE • The astonishing true story of "one of the most startling police corruption scandals in a generation" (The New York Times), from the Pulitzer Prize-nominated reporter who exposed a gang of criminal cops and their yearslong plunder of an American city NOW AN HBO SERIES FROM THE WIRE CREATOR

DAVID SIMON AND GEORGE PELECANOS “A work of journalism that not only chronicles the rise and fall of a corrupt police unit but can stand as the inevitable coda to the half-century of disaster that is the American drug war.”—David Simon Baltimore, 2015. Riots are erupting across the city as citizens demand justice for Freddie Gray, a twenty-five-year-old Black man who has died under suspicious circumstances while in police custody. Drug and violent crime are surging, and Baltimore will reach its highest murder count in more than two decades: 342 homicides in a single year, in a city of just 600,000 people. Facing pressure from the mayor’s office—as well as a federal investigation of the department over Gray’s death—Baltimore police commanders turn to a rank-and-file hero, Sergeant Wayne Jenkins, and his elite plainclothes unit, the Gun Trace Task Force, to help get guns and drugs off the street. But behind these new efforts, a criminal conspiracy of unprecedented scale was unfolding within the

police department. Entrusted with fixing the city’s drug and gun crisis, Jenkins chose to exploit it instead. With other members of the empowered Gun Trace Task Force, Jenkins stole from Baltimore’s citizens—skimming from drug busts, pocketing thousands in cash found in private homes, and planting fake evidence to throw Internal Affairs off their scent. Their brazen crime spree would go unchecked for years. The results were countless wrongful convictions, the death of an innocent civilian, and the mysterious death of one cop who was shot in the head, killed just a day before he was scheduled to testify against the unit. In this urgent book, award-winning investigative journalist Justin Fenton distills hundreds of interviews, thousands of court documents, and countless hours of video footage to present the definitive account of the entire scandal. The result is an astounding, riveting feat of reportage about a rogue police unit, the city they held hostage, and the ongoing struggle between

American law enforcement and the communities they are charged to serve. CHILDREN'S BOOK OF THE YEAR 2019 SUNDAY TIMES NUMBER ONE BESTSELLER "A very funny and inspiring read! Brilliantly practical with a wide variety of examples that make it relevant for both boys and girls (and adults)!" - online customer review "A truly inspiring book for the younger generation!" - online customer review "Genuinely funny and engaging. There are messages in this book for both adults and children. It's a must read." - online customer review "An awesome book about becoming awesome. How inspiring it is to know that there's a path to awesomeness and that anyone - absolutely anyone - can go down that path. This book shows you how." - Carol Dweck, Professor of Psychology, Stanford University This positive and empowering guide, by bestselling mindset author Matthew Syed, will help boys and girls build resilience, fulfil their potential and become successful, happy, awesome adults. I'm no good at sport ... I can't

do maths ... I really struggle with exams ... Sound familiar? If you believe you can't do something, the chances are you won't try. But what if you really could get better at maths, or sport or exams? In fact, what if you could excel at anything you put your mind to? You Are Awesome can help you do just that, inspiring and empowering young readers to find the confidence to realise their potential. The first children's book from Times journalist, two-time Olympian and best-selling mindset author Matthew Syed, it uses examples of successful people from Mozart to Serena Williams to demonstrate that success really is earned rather than given, and that talent can be acquired. With hard work and determination, practice and self-belief, and, most importantly, a Growth Mindset, there's no reason why anyone can't achieve anything. Practical, insightful and positive, this is the book to help children build resilience, embrace their mistakes and grow into successful, happy adults. Also available: The You

Are Awesome Journal. Whether setting out your goals, planning the best practice ever, keeping calm with breathing exercises or making paper aeroplanes to understand marginal gains, you'll love the brilliant activities in The You Are Awesome Journal - it's the perfect companion to You Are Awesome! The true stories behind historical events give readers a fascinating new look at our past. The revelations shock and amaze by exposing veiled motivations and convenient inaccuracies in well-documented actions by established leaders that often have a continuing effect on the world. Each of the fifteen chapters points out a myth that is held as a common truth in history and summarizes what we think we know. Then the author shreds the tale to academic ribbons using the latest findings on each subject. Each true story sets the record straight, reveals timeless ulterior motives, introduces important personalities who successfully (and suspiciously) avoided responsibility in common history texts, and notes

underlining issues that have continued relevance in the modern age. For instance, did Nero really fiddle as Rome burned? Did Paul Revere actually alert the militia that the British were coming? Did the Catholic Church imprison Galileo because his teachings conflicted with the Bible? Weir takes on all these myths and tells the reader what really happened. The latest installment in the highly acclaimed, internationally bestselling Strike series finds Cormoran and Robin ensnared in another winding, wicked case. When frantic, disheveled Edie Ledwell appears in the office begging to speak to her, private detective Robin Ellacott doesn't know quite what to make of the situation. The cocreator of a popular cartoon, The Ink Black Heart, Edie is being persecuted by a mysterious online figure who goes by the pseudonym of Anomie. Edie is desperate to uncover Anomie's true identity. Robin decides that the agency can't help with this—and thinks nothing more of it until a few days later, when

she reads the shocking news that Edie has been tasered and then murdered in Highgate Cemetery, the location of The Ink Black Heart. Robin and her business partner, Cormoran Strike, become drawn into the quest to uncover Anomie's true identity. But with a complex web of online aliases, business interests and family conflicts to navigate, Strike and Robin find themselves embroiled in a case that stretches their powers of deduction to the limits - and which threatens them in new and horrifying ways . . . A gripping, fiendishly clever mystery, The Ink Black Heart is a true tour-de-force.

Some of the more complex layouts in the book are rendered as images in the ebook version so that you can enlarge on your preferred reading device A New York Times Editors' Choice Book Named a Most Anticipated Book of 2022 by Literary Hub and Goodreads A playful history of the humble index and its outsized effect on our reading lives. Most of us give little thought to the back of the book—it's just where you go to

look things up. But as Dennis Duncan reveals in this delightful and witty history, hiding in plain sight is an unlikely realm of ambition and obsession, sparring and politicking, pleasure and play. In the pages of the index, we might find Butchers, to be avoided, or Cows that sh-te Fire, or even catch Calvin in his chamber with a Nonne. Here, for the first time, is the secret world of the index: an unsung but extraordinary everyday tool, with an illustrious but little-known past. Charting its curious path from the monasteries and universities of thirteenth-century Europe to Silicon Valley in the twenty-first, Duncan uncovers how it has saved heretics from the stake, kept politicians from high office, and made us all into the readers we are today. We follow it through German print shops and Enlightenment coffee houses, novelists' living rooms and university laboratories, encountering emperors and popes, philosophers and prime ministers, poets, librarians and—of course—indexers along the way. Revealing its

vast role in our evolving literary and intellectual culture, Duncan shows that, for all our anxieties about the Age of Search, we are all index-rakers at heart—and we have been for eight hundred years. A startling look at the unexpected places where violent hate groups recruit young people. Hate crimes. Misinformation and conspiracy theories. Foiled white-supremacist plots. The signs of growing far-right extremism are all around us, and communities across America and around the globe are struggling to understand how so many people are being radicalized and why they are increasingly attracted to violent movements. Hate in the Homeland shows how tomorrow's far-right nationalists are being recruited in surprising places, from college campuses and mixed martial arts gyms to clothing stores, online gaming chat rooms, and YouTube cooking channels. Instead of focusing on the how and why of far-right radicalization, Cynthia Miller-Idriss seeks answers in the physical and virtual spaces where hate is

cultivated. Where does the far right do its recruiting? When do young people encounter extremist messaging in their everyday lives? Miller-Idriss shows how far-right groups are swelling their ranks and developing their cultural, intellectual, and financial capacities in a variety of mainstream settings. She demonstrates how young people on the margins of our communities are targeted in these settings, and how the path to radicalization is a nuanced process of moving in and out of far-right scenes throughout adolescence and adulthood. Hate in the Homeland is essential for understanding the tactics and underlying ideas of modern far-right extremism. This eye-opening book takes readers into the mainstream places and spaces where today's far right is engaging and ensnaring young people, and reveals innovative strategies we can use to combat extremist radicalization. Dramatizes the issues of sexism through a first-person narrative, interspersed with an interpretive commentary,

of a day in the life of a hypothetical urban professional woman We are under continual attack from electromagnetic fields (EMFs) radiating from power lines, household wiring, microwave ovens, computers, televisions, clock radios, cellular phones, electric blankets, and other appliances. Researchers have correlated electropollution with increases in cancer, birth defects, depression, learning disabilities, chronic fatigue syndrome, Alzheimer's disease, and sudden infant death syndrome. The danger is real and with increasing use of electricity in our environment it is one of the reasons why many scientists believe some disease rates are on the rise. EMFs are not blocked or weakened by trees, walls, buildings, or other structures. Like X-rays, they pass through these objects and into our bodies—disrupting normal cellular function and biological processes. Our greatest exposure to EMFs come from within our home and offices. All household and office appliances emit EMFs. But you cannot tell which are most dangerous by

their size or function. Often the small devices like electric can openers and hair dryers are much more dangerous than the larger ones such as electric ovens or refrigerators. In this book you will find out:

- About the dangers you face with EMF exposure
- Why certain diseases persist in spite of medical treatment
- If microwave ovens are safe or not
- What home appliances are the most dangerous
- Where we get the most exposure
- How to find hidden EMF "hot spots" in our homes

This book offers practical ways to protect yourself in your home and office from that effects of electromagnetic radiation. You will learn how to take simple precautionary steps to reduce EMF exposure by as much as 90 percent and virtually eliminate the threat of electropollution on your health. If you use electricity, you need this book! Science is based not only on observation and experiment, but on theory as well. As Einstein said, "Theory tells us what to measure." And theories are often crystallized into succinct calculations, like those

made using Einstein's famous $E = mc^2$. This book looks at fifty such great calculations, exploring how and why they were developed and assessing their impact on the history of science. As the author shows, many significant scientific calculations are quite simple and fairly easy to understand, even for readers with little math background. But their implications can be surprising and profound. For example, what links a famous comet and the cost of an annuity? Why do scientists claim there is "dark matter" in the universe if it can't be observed? How does carbon-based life on Earth depend on a quirk of nuclear physics? The answer to each question is an illuminating calculation. This accessible, engaging book will help you understand these breakthroughs and how they changed our view of life and the world. In the days before mobile phones, the internet and 24-hour news channels, the easiest way for a British foreign correspondent to find out what was going on in the world was to phone the local office of

Reuters news agency and ask: 'Is anything happening?' That's how the award-winning BBC reporter and presenter Robin Lustig started out in journalism, working for Reuters as an agency man. During a distinguished career spanning more than forty years, he watched the world of news change beyond recognition, as he reported on terror attacks, wars and political coups. In this witty and illuminating memoir, Lustig looks back on his life as a newsman, from coming under fire in Pakistan to reporting on the fall of the Berlin Wall; from meeting Nelson Mandela to covering Princess Diana's sudden death. Back in the studio, Lustig lets us in through the BBC's back door for a candid, behind-the-scenes look at some of his triumphs and disasters working for the nation's favourite broadcaster. He writes of his childhood as the son of refugees from Nazi Germany and, drawing on thirty years of reporting about the Middle East, he comes to a startling conclusion about the establishment of the state of Israel. Astute, incisive and

frequently hilarious, *Is Anything Happening?* is both an irresistible personal memoir and an insightful reflection on world events over the past forty-five years. “This startling, vital book deserves our attention.” —San Francisco Chronicle For readers of *War Dogs* and *Bad Blood*, an explosive look inside the rush to profit from the COVID-19 pandemic, from the award-winning ProPublica reporter who saw it firsthand. The United States federal government has spent over \$10 billion on medical protective wear and emergency supplies, yet as COVID-19 swept the nation, life-saving equipment such as masks, gloves, and ventilators was nearly impossible to find. In this brilliant nonfiction thriller, award-winning investigative reporter J. David McSwane takes us behind the scenes to reveal how traders, contractors, and healthcare companies used one of the darkest moments in American history to fill their pockets. Determined to uncover how this was possible, he spent over a year on private jets and in secret

warehouses, traveling from California to Chicago to Washington DC, to interview both the most treacherous of profiteers and the victims of their crimes. *Pandemic, Inc.* is the story of the fraudster who signed a multi-million-dollar contract with the government to provide lifesaving PPE, and yet never came up with a single mask. The Navy admiral at the helm of the national hunt for additional medical resources. The Department of Health whistleblower who championed masks early on and was silenced by the government and conservative media. And the politician who callously slashed federal emergency funding and gutted the federal PPE stockpile. Winner of the Goldsmith Prize for Investigative Reporting, McSwane connects the dots between backdoor deals and the spoils systems to provide the definitive account of how this pandemic was so catastrophically mishandled. Shocking and revelatory, *Pandemic, Inc.* exposes a system that is both deeply rigged, and singularly American. From ants to

tarantulas--500 awesome facts and photos about bugs for kids ages 8 to 12 Have you ever wondered how many bugs there are on Earth? Or which ones can fly the highest? The Fascinating Bug Book for Kids is packed with 500 incredible facts about insects, arachnids, crustaceans and other creepy crawlies for hours of exploration. Find full-color pictures that uncover life as a bug, alongside trivia about termite towers, beautiful butterflies, cool cocoons, and more. You'll discover secrets of

these amazing creatures, such as... When threatened, MILLIPEDES release smelly ooze from glands along their bodies to protect themselves from predators. Scientists believe that the COCKROACH is the oldest winged insect. Most of the silk that we use in clothing and bedsheets is produced from the cocoons of SILKWORMS. Kids will light up as they discover tiny larvae and enormous spiders with the best in bug books for kids.
